

*The transition to college is a site of intense struggle and amazing potential. iT3's goal for "developmental" education is to recognize the struggles of our students while fostering their potential.*

*To that end, the iT3 Symposium is an opportunity to share and develop innovative perspectives and practices that position students as knowledge makers, language users, and adaptive partners in learning.*

INNOVATIVE TEACHING THROUGH TRANSITIONS  
A HS-IHE Symposium on Transitional Math & English

SAVE THE DATES!
